We think—on we have often said before—that Mr. Delice in minches in this stand. The establishment of a carefully actioned joint Onegranical weekingcommittee on intelligence (whose functions would appreciate these of the Joint Committee on Atomic Electry), would provide imperiant ometrol over activities that are rested in secrety and conducted without benefit of the normal restriction and restrictions of democratic government.

Inciligance in a cornections upon which effective policy must be built. But intelligance agancies, cheald suct, themselves made policy— as they have aspectimes done in the past. And the paper they wild, which derives primarily from accracy, in an great that it must be effectivaly manifered.

Such a joint committee should not be limited to supervision of the C.L.A. alone. It should supervise the extre intelligence community for adequacy, effectiveness and abuse. This control is all the more important now, since there are glaring gaps — for which no responsibility has been publicly osessed—in the intelligence preture presented to the nation for last replacember and early October, when the Fuences missile emplocurent program in Community its height.

It is particularly important to weight the effects on American incliquence readilities of the recent enferred merger in the Poulagon of the three service agencies into a moneithic Defense Intelligence Agency. Sensor's Sensor's committee will presumably find set whether this merger impaired intelligence collection or, even worse, facilitated the distortion of intelligence by tep policy maker ine that their evaluation of intelligence would accord with their preconceive would accord with their preconceive would accord with their preconceive members of both parties and both locumenters of both parties and both locumenting or american and control of all intelligence facilities something that recent history shows a ladly needed.

Peking is now trying to sort out the confusion in writing. A high-level committee has been appointed to restudy the whole field of writing reform.
